

Your pipetting options begin here – whether you require starter kits, single channel or multichannel pipettors, positive displacement or dispensing pipettors, with fixed or variable volume, we have the leading suppliers offering you the latest advancements in precision, accuracy, user control and comfort, such as lower pipetting forces and soft tip ejection. We cover a variety of applications including PCR, environmental analysis, immunology, pharmacology, quality control and routine testing. To complement your choice of pipettor, we offer a wide range of tips, including standard, microvolume, filter and low retention tips, available sterilised or non-sterile. And that's not all, tips are available in bulk bags, racks or environmentally friendly reload packaging.

## Pipettors, variable volume, Fisherbrand® Elite™

- Fully autoclavable
- Extremely low plunger forces - work longer without fatigue and reduce the risk of RSI
- Soft touch tip ejection - a gearing mechanism reducing tip ejection force by up to 50%
- Ergonomic comfortable lightweight handle
- Optimal fit with Fisherbrand® SureOne™ pipettor tips
- Super blow out piston - creates 150% bigger air push than conventional piston ensuring delivery of micro size drops
